

Dear Credentialed Clinicians,

As many of you may be aware, the McKenzie Institute International offers its International Diploma Program each year, This Program is the culmination of the McKenzie educational curriculum and offers the highest level of training and competency available, and the recognition as a Diplomate in MDT.

The Diploma consists of 3 components:

- 12 weeks online theoretical component which commences each February.
- 9 weeks supervised clinical (which is undertaken at one of our clinical training sites. Variable options for the clinical training may be considered if attendance at one is not possible)
- Final Diploma exam consisting of 4 exams over 2 days which are conducted online.

The Dip. MDT programme offers a unique opportunity to develop your clinical reasoning skills with an MDT orientated focus to ensure you are:

- fully utilising the system,
- assessing in an effective and efficient manner,
- forming enhanced patient alliances,
- accurately classifying and utilizing the patient classification to ultimately allow you to provide targeted intervention.

You'll also develop your understanding in accessing, understanding, and evaluating research relevant to MDT, to enhance your ability to promote critical analysis and clinical reasoning skills. In all, the Diploma aims to improve your skills as a clinician and improve the outcomes for your patients.

One of the highlights of the Program that our graduates often talk about is the opportunity it gives to participate in this advanced clinically oriented educational experience alongside colleagues from throughout the world who are also passionate about MDT. You will not only learn from the 14 theoretical instructors and the on-site clinical educators, but also from each other, sharing diverse clinical experiences and collaborating closely on multiple projects.

The clinical training sites, which offer a total of 9-week placements, are currently located in Australia (for Australian and New Zealand residents), Belgium, Canada, Denmark, France, Germany, the Netherlands, Sweden, and the USA.

I would like to extend an invitation to take your place on this unique professional development Program for 2024. To find out more information about the Program, including the experiences of recent graduates and current students, please visit our website:
